**CLEAN, SAFE AND
WELL-FUNCTIONING WATERS**

A large green amphibious excavator is shown in a marshy environment. The machine is equipped with a large, dark-colored hydraulic attachment, possibly a grapple or a specialized bucket, which is positioned over a body of water. The excavator's boom and arm are extended, and the machine is floating on a platform of water. The background features a line of trees and a cloudy sky. The overall scene is framed by a teal border.

PROVEN Design & Durability

Operating in over 70 countries worldwide.

Now Manufactured in Michigan for the North America market

A green amphibious dredger, labeled 'Classic IV', is shown in operation in a narrow waterway. The machine is equipped with a long conveyor belt that is discharging a large amount of dark sediment and debris into a pile on the right bank. The dredger has a large excavator arm on the left side. The background shows a clear blue sky and some trees and reeds along the banks.

RAKING

REVITALIZE RIVERS, LAKES AND CANALS.
RAKING REMOVES INVASIVE VEGETATION AND TRASH

A green amphibious dredger is shown in operation on a body of water. The machine is equipped with a large hydraulic arm that is lifting a long, dark wooden pile. The dredger is positioned near a stone and gravel shoreline. In the background, there is a large industrial facility with several tall chimneys and buildings under a clear blue sky. The water is calm and blue.

U.S. Fish and Wildlife Service

**DYNAMIC SOLUTIONS TO
CUSTOM VESSEL REQUIREMENTS**

Moran Iron Works is a national leader in custom vessel fabrication, specializing in steel and aluminum hulled vessels. With 40 years of experience, we excel at metal fabrication with precision, quality, and efficiency.

**WHAT
WE'RE ABOUT:**

**VESSELS
BOATS
BARGES**

Moran Iron Works specializes in custom boat and barge projects. Our flexibility allows maximum customization. Our highly skilled craft work force allows repeatable high quality every time.
